reddot design award
winner 2006

17-Inch TFT Monitor keyboard, EDRM

Another award winning development from Eldon has just made its debut into the range! The prestigious "Reddot Design Award" selected the Eldon Rack Mounted TFT monitor keyboard as their best value product. The judges were not only impressed with the overall design, but were also pleasantly surprised by the amount of functionality the keyboard had as standard.

The one unit high monitor keyboard, can be withdrawn from the rack by means of smooth-gliding ball bearing telescopic slides and cable arm. The slides have friction stops to prevent movement of the keyboard when it's in its withdrawn position. Torque hinges ensure the 17 Inch monitor stays secure when it's in an upright position. It comes supplied as standard with an integrated wide range power supply (100-240VAC) and a PS2 interface for international keyboards and touch pads.

An optional USB Interface in the front-trim can be supplied. Even when the KVM switch is attached, the total height will not exceed one unit high. The unit can manage up to 16 servers, and can also be used by the OEM or machine builder for stand-alone machine software programming.

Standard equipped with a 17-Inch full colour monitor, it can be supplied with various keyboard possibilities.

Delivery options Monitor - Keyboard drawer

Description	Screen size Inch	Front USB	KVM switch	Number of ports	Cat. Number Int. keyboard
17 PS/2 D (ex KVM)	17	no	no ¹	1	EDRM 17000
