

Mounting Instructions

Step 1:

Unpack the box and prepare for it for mounting. Either by laying the back panel on the floor or hanging it on the wall

Step 2:

Mount the bottom into the back panel and secure it with the corner pieces

Step 3.

Place the vertical corner profiles in the front and secure it with the supplied screws

Step 4:

Mount the top on the back panel and corner profiles equal to the bottom and secure it with the corner pieces

Step 5.

Finish the box by mounting the 19" profiles in the front and closing the sides by sliding-in the side panels
Finally the door is put in place and secured with the red clip mounted on the top hinge. The door also secures the side panels
